

PTS Pallet Truck Scale

Adam Equipment's PTS pallet truck scale allows users to measure the weight of objects as they are moved from one place to another whether it's in a warehouse, on the production floor, or in the shipping department.

The sleek, low profile design of the PTS coupled along with solid rubber wheels, steel pallet forks, and zero radius pivoting handle make the PTS a must have for commercial and industrial users.

Included with the PTS is the proven AE 402 indicator which uses an LCD display giving bright display in poor visibility areas combined with easy to use keypad and long life battery makes the PTS easy and convenient to use. The AE 402 is IP66 sealed for dust and water environments.

With nearly forty years of experience in the production of weighing equipment you can trust Adam for quality products that offer a range of features designed for many different applications.

AE ADAM[®]
THE RIGHT BALANCE
Speed, Performance, Value

PTS Highlights:

When using the PTS with the AE 402 indicator for quality control, the check weighing feature with coloured LED indicators can quickly indicate underweight, overweight and acceptable limits.

Zero turning radius pivot steering provides mobility for tight spots and the solid pneumatic pump makes for better control when handling heavy weights.

Manage overloads with ease. The capacity tracker shows where you are in the weighing range. The display monitors the weight value and warns you as you are getting to the scales capacity.

Large keys are colour coded to clearly identify the more frequently used buttons. An internal rechargeable battery with auto-off power saving function, lets you use the PTS where you need it.

Solid construction with solid rubber wheels, reinforced steel pallet forks and a stainless steel housing make for a durable industrial pallet truck scale.

The most flexible pallet truck scale available to meet today's demanding commercial and industrial applications

AE 402 Indicator

Technical Specifications

Model	PTS 2000+AE402
Capacity	2000kg
Readability	0.5kg
Linearity (+/-)	1.0kg
Fork Size	160mm (W) x 1150mm (L)
Weighing Units	Kilograms (kg), Pound (lb), Newtons (N)
Applications	Weighing, Accumulation, Check weighing Animal / Dynamic weighing, Percentage weighing
Stabilisation Time	2 sec
Interface	Bi-directional RS-232
Power Supply	Switchable 115v-230vAC Output 12vDc 800mA
Calibration	External calibration
Display	Backlit LCD display with LED check weighing lights
Net Weight	110kg
Overall Dimensions Dims: L x W x H	1580mm x 690mm x 1180mm

Colour Coded Keys

Colour coded keys make identifying functions quick and easy.

Power Supply

Internal rechargeable battery.

Large Backlit Display

Weights are quickly and easily read on the large and brilliant backlit LCD display.

Features

- Hold Function
- Full range tare
- Backlit LCD display
- Digital filters
- Internal rechargeable battery
- Bi-directional RS-232 interface
- Quick and easy keypad configuration
- External calibration
- Large display
- IP66 indicator
- Steel construction
- Adjustable angle indicator
- Check weighing LED lights
- Capacity Tracker
